

# AXESNET CARD RELOADER WIRING DIAGRAM

## PIN DEFINITION

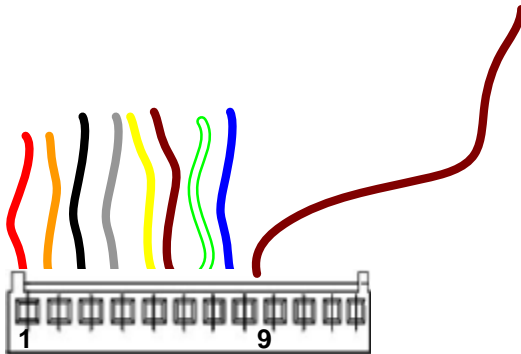

- 1: GREEN:** NOT CONNECTED
- 2: RED:** 5V
- 4: BLUE:** NOT CONNECTED
- 5: GREY:** NOT CONNECTED
- 6: BLACK:** GROUND
- 7: ORANGE:** 12V
- 8: YELLOW:** CASH COUNT (Bill Validator Pulse)
- 9: BROWN:** COIN COUNT (Optionnal Coin Comparator Pulse)

## PIN DEFINITION

To avoid any Electromagnetic Static Discharge (ESD) problem, connect the Ring Terminal of this **GREEN** wire to one of the 4 bolts holding the reader in place into the machine.

The other end of this cable should go trough a good ground reference and a large metal frame. We suggest using a screw on the power supply.

## PIN DEFINITION

- 9: BROWN:** BILL VALIDATOR ENABLE  
Enable = LOW
