

AxesPOS NET V2.3 QUICK START

1. PUT SAM CARD

You need to install the AXESPOS SAM CARD in the socket SAM1.

1. Open the battery case under the AXESPOS device with a Phillips screwdriver
2. Flip the battery out of the enclosure
3. Gently slide the SAM CARD as shown on the above pictures (the notch should be in the same orientation as the red circle on the last figure)

4. Put the battery back in the compartment
5. Close and the cover.

2. NETWORK CONNECTION

Connect a regular network cable in LAN/COM Connector (Blue Arrow). Be sure that the LAN/COM Switch is at LAN Position (Red arrow).

3. LOAD SAM CARD

1. Power the unit with the supplied cable. You could use the phone style extension cable or not depending of your counter top configuration.
2. Press the <FUNC> Key and then select 'MANAGER'.
3. Enter the Manager's password (default value: 333333).
4. Select 'LOAD SAM'
5. Use a BANK CARD and follow the instructions to transfer 50 000,00\$ to the SAM CARD. This value is enough to start using the AxesPOS device.
